List of Tables

List of Figures

This document introduces the result of the Unit VnV procedure.

3 Functional Requirements Evaluation

All the functional requirements have been met, except for the division function.

4 Nonfunctional Requirements Evaluation

All the requirements have been met.

4.1 Usability

During implementation, we find out that function name of `ToleratedEquality` is too long to use. For the sake of compatibility, we introduce another function same as this one, only with the name shortened to `TolEq`. This function is essentially a wrapper to the original one, and the structure is too simple, so we do not test it.

4.2 Performance

4.3 etc.

5 Comparison to Existing Implementation
